MAKING THE TRANSITION TO ISO 14001:2015 **OUR TRAINERS KNOW THE ENVIRONMENT**

MAKING THE TRANSITION TO ISO14001:2015

1 day

This Making the Transition to ISO14001:2015 course is priced at AUD\$600.00 p/p plus GST. The price includes morning and afternoon refreshments, lunch, learner manual, electronic gap analysis tool, certificate of achievement and as list of ISO 14000 series of environmental management standards together with other useful standards to support your EMS.

ISO 14001:2004 has been revised and ISO 14001:2015 Environmental management systems – Requirements with guidance for use was published on 15 September 2015. The revised standard is based on a new “high level structure” which is to be adopted by all new and revised ISO standards, and is a significant change from ISO 14001:2014.

Organisations certified to ISO 14001:2004 have until 31 August 2018 or their next recertification (whichever is the sooner) to transition to ISO 14001:2015. After 1 September 2018 no ISO 14001:2004 certificates will be recognised or issued.

Course Objectives

The revision to ISO 14001 provides an opportunity for organisations to enhance the way they improve environmental and sustainability performance and drive competitiveness, productivity, resilience and growth. This course is intended to help organisations achieve the benefits of the transition to the revised standard by enhancing the capability of those responsible for implementing and improving their Environmental Management System (EMS).

This one-day (7-hours) course is aimed at environment and sustainability professionals responsible for implementing and maintaining environmental management systems, and internal and external auditors conducting EMS audits. It will provide participants with an understanding of the structure and flow of ISO 14001:2015 and the intent and implications of its new requirements, so that they can effectively plan for their organisations to realise the full benefits of the transition to ISO14001:2015.

Exemplar Global Assessment for Auditors

Persons certified by Exemplar Global as Qualification & Competency based Environmental Management Systems Auditors (all grades); Environmental Management System Internal Auditors; and Certified Environmental Management Systems Practitioners will need to complete the IAAR International transition assessment, available to Exemplar Global certified individuals online through the Exemplar Global College website. The ISO 14001: 2015 assessment must be completed by 1 February, 2016. Exemplar Global certified auditors are not allowed to conduct any audits or

skill examinations to the ISO14001:2015 standard without successfully completing the Transition Assessment. Submission of audits and/or skill examinations to the updated standards before successful completion of the Transition Assessment will not be accepted by Exemplar Global. This course will provide a valuable basis for undertaking the assessment.

Learning Outcomes

An important element of this course is to ensure that learners appreciate the holistic nature of some of the changes, and the implications for process integration, environmental and business strategy and risk management.

It is proposed to present the Making the Transition to ISO14001:2015 training as an IEMA Certified course and that you will receive an IEMA certificate of achievement. IEMA is the Institute for Environmental Management and Assessment, based in the UK, with over 15,000 members in 95 countries. The IEMA course has been developed in consultation with Martin Baxter, IEMA's Chief Policy Advisor, who led the UK delegation to the international working group in the production of ISO 14001:2015.

The course is structured around two principal learning outcomes:

1. Understand the changes to ISO 14001: 2015 and their intent
2. Identify and plan actions to enable an organisation to conform to, and so realise the benefits of, the new requirements.

The key changes to ISO 14001 which this course addresses are:

- Organisational context and the needs of interested parties;
- Risks and opportunities;
- Life cycle perspective - control and influence;
- Integration into core business processes;
- Environmental sustainability;
- Leadership;
- Competence;
- Compliance obligations and demonstration of compliance status and;
- Risk-based thinking

Gap Analysis Toolkit

As part of the course, delegates will also benefit from an electronic ISO 14001 Gap Analysis Toolkit to assist in the planning, management and transition to ISO 14001:2015. The toolkit comprises:

- An Excel workbook;
- Guidance notes and checklist; and
- A presentation to adapt and use in your organisation.

Who Should Attend

- Senior management with responsibility for management systems
- EMS officers/coordinators
- Safety managers/officers with responsibility for environment
- Quality managers/officers or others with responsibility for integrated management systems
- Environmental practitioners certified by Exemplar Global (The ISO 14001: 2015 assessment must be completed by 1 February, 2016)
- Environmental advisors
- Consultants
- Regulators
- Anyone with a certified EMS, or intending to have an existing or new EMS certified

Workshop Dates 2015

The first course will be available in Newcastle NSW on Friday 27th November 2015, following the Environmental Auditor Certification Workshop to be held from Monday 23rd to Thursday 26th November.

Location	Dates	Code

OUR TRAINER

Graham Brown

Graham holds a Master of Science degree and has over 40 years industrial and commercial experience in the environmental industry. Graham is a certified auditor in Australia, the UK and USA and has completed over 300 audits nationally and internationally. Graham is an experienced lecturer and trainer, having developed and delivered training in a range of formats, including presentation of papers at several Australian universities. He has assisted with the training of more than 2000 coal miners in environmental awareness, as well as several thousand others from government and industry in environmental awareness, environmental auditing, environmental management systems, pollution control, risk management, waste management, energy efficiency and other topics. Graham was a joint presenter in Australia of Dialogue on the Environment, a world wide environmental awareness training program for Volvo and runs executive-level due diligence workshops for several of Australia's leading business and government organisations.

Graham has been involved internationally in the development of over 50 environmental, health and safety, community relations, quality and integrated management systems, the majority of which have been certified to the applicable Australian and international standards.
